

TECHNICAL SHEET

Indigo® Hands

DESCRIPTION

aquama® is a detergent and disinfectant solution for the hands, obtained on site from water, salt and electricity.

TECHNICAL CHARACTERISTICS

Form: liquid

Appearance: clear liquid

Color: transparent

Odor: slight chlorine odor

Freezing point: 0°C

Boiling point: 100°C

Solubility: like water

pH: 7 to 9

Fragrances: none

Surfactants: none

Colors: none

Excipients: none

STORAGE CONDITIONS OF THE SOLUTION PRODUCED

Between 0 and 40 °C, in containers and protected from direct sunlight.

COMPOSITION

Active sodium hypochlorite.

USES

Hand disinfection and virucidis (TP1).

Spray

Microfiber

Bucket

Injection

Carpet cleaner

Kitchen

Meeting room

Office

Windows

Bathroom

Textile

Cars

Marble

Linoleum / PVC

Parquet

Tiling

Carpet

STABILITY OF THE SOLUTION

Freedom S®	1 day. Reactivable up to 5 times.
Freedom Pure®	3 days. Can be reactivated twice. After 10 days, prepare a new spray.
Hogeron® VRB, Falcon R® VRB	3 months. Not reactivable.

PRECAUTIONS

See the safety data sheet. Available on request from your sales contact or on our website www.aquama.com.
Non-flammable solution.

STANDARDS

The solution has passed the following European standards, without mechanical action:

Bactericide

EN 13727: Antiseptics and chemical disinfectants. Quantitative suspension test for the evaluation of bactericidal activity in medicine. This European Standard applies to products used in medicine for hygienic and surgical friction of the hands, hygienic and surgical washing of hands, disinfection of instruments by immersion, as well as the disinfection of surfaces by wiping, spraying, flooding or other means (15 sec | 20°C – Phase 2, Step 1).

Yeasticidal

EN 13624: Antiseptics and chemical disinfectants. Quantitative suspension test for the evaluation of fungicidal or yeasticidal activity in medicine. This European Standard applies to products used in medicine for friction and washing hygienic hand, for surgical rubbing and washing of hands, for disinfection of instruments by immersion and for surface disinfection by wiping, spraying, rinsing or the like (15 sec | 20°C – Phase 2, Step 2).

Virucidal

EN 14476 + A2 (Model VRB): Enveloped viruses MVA, Coronavirus, Sars-Cov-2 (15 sec | 20°C).

EN 1500 (accessible on certain machines): Antiseptics and chemical disinfectants. Hygienic treatment of hands by friction. This European Standard applies to products intended for the hygienic treatment of hands by friction used in areas and situations where disinfection is medically recommended (15 sec | 20°C).
